

## *Testing Services*

### **1. Single Cell Testing Services**

SOFCMAN has 8 sets of 100W single cell testing equipments, 2 set of button cell testing equipments and a set of electrochemical workstation the Solartron Analytical 1287 coupled with frequency response analyzer 1260. We offer SOFC cell testing service including I-V measurement, cell resistance testing, AC impedance testing and duration test of single cells.

**Price:**

1200.00 RMB/piece with an active area of 4cm×4cm, includes open circuit voltage and cell resistance. If you need the service of AC impedance testing and long term testing, the price will be higher.

AC impedance: 22.00 RMB/piece

Long term testing: 12.00 RMB/hour

### **2. Button Cell Testing Services**

**Price:**

960.00 RMB/piece, includes open circuit voltage and cell resistance.

### **3. High Temperature Conductivity Testing Services**

The Solartron Analytical 1287 coupled with frequency response analyzer 1260 as an electrochemical workstation can offer high accuracy, wide band, potentiostat/galvanostat testing service.

This set of electrochemical workstation with a special probe fixture and high temperature furnace can be used to test and analyze EIS curves of SOFC electrolyte at temperature range from room temperature to 1000°C. We also can supply other services according to customer's requirements.

**Price:**

1200.00 RMB/piece, from room temperature to 1000°C.
